

Dhruvi Padhiyar

SOFTWARE DEVELOPER

[LinkedIn](#) | 6359127370 | dhruvi.padhiyar274@gmail.com

Skills

- **Programming & Frameworks:** PHP, Laravel, CodeIgniter, Livewire, JavaScript, HTML, CSS, JQuery, MERN Stack
- **Backend & APIs:** RESTful APIs, MySQL, MongoDB, Web Scraping
- **Version Control:** Git

Experience

Aipxperts Technolabs – Laravel Developer

April 2024 – Present

- Working on backend development using Laravel, focusing on RESTful APIs, database design, and secure business logic implementation.
- Contributed to Legiit (legiit.com) using Laravel + React, developing APIs and optimizing system performance.
- Developed features for the Yokohama Malaysia website using Laravel + Livewire, enhancing interactivity and backend efficiency.
- Participated in the development of casino-related platforms, implementing custom modules and backend functionalities.

Aipxperts Technolabs – Laravel Trainee

November 2023 – April 20224

- Trained in Laravel fundamentals: MVC, Eloquent ORM, APIs, and authentication.
- Built demo projects and supported internal development tasks.
- Gained hands-on experience with real-world backend systems.

Education

LJ Institute of Engineering and Technology, Ahmedabad

2022 – Present

Bachelors in Information Technology

Government Polytechnic for Girls, Ahmedabad

2019 – 2022

Diploma in Information Technology

Personal Projects

- **Chrome Extension – Jira backlog export:** Developed a Jira browser extension to export all backlog tasks with details to CSV by simply entering the board name, streamlining task reporting and data sharing.
- **Chrome Extension – LM:** Built a Chrome extension that redirects users to official Bootstrap or Laravel documentation based on the entered topic name, enabling quick access to relevant resources for faster development.
- **Suicide rate – Data analysis:** Analyzed and visualized global suicide rate data using Python, Pandas, NumPy, and Matplotlib to identify key trends.
- **Developed a real-time chat app in Laravel** using Pusher, enabling instant messaging with event broadcasting.
- **Created a live chat system in Laravel** using Socket.io, implementing WebSockets for seamless two-way communication.

Certificates & Achievements

- **Hackout 2023:** 36-hour hackathon finalist at DA-IICT
- **NASA Space Apps Challenge 2023:** Participated in a 48-hour hackathon at Nirma University.
- **TCS-NQT Score:** 2352/3600
